Environmental Science Archives

Dr. Zorawar Singh
Editor in Chief, ESA

environmentalsciencearchives@gmail.com

Environmental Science Archives is a renowned worldwide, multidisciplinary, peer-reviewed, open-access online academic publication. The journal's purpose has been to keep researchers, academics, and scientists updated of the most recent research. Over the time, the journal will grow, transform and establish itself on the international platform.

ESA has a rich and diverse Editorial Board Members from different countries with more than 20 genius minds working behind the website for presenting the best researches in the field of environmental sciences. I warm-heartedly welcome the new members of the Editorial Board, and thank them for accepting my invitation to join ESA Editorial Board. The journal also has more than 5 Academic Board Members for their continuous feedback about the quality of the published research papers. Feedback received from researchers and Editorial Board Members for the journal has propelled us to expand and move briskly. Further, the growing popularity of ESA can be witnessed by the e-mails we receive from the scientists to serve the journal as EBMs and reviewers.

We have made our best efforts to make the journal website (www.envsciarch.com) simple and easy for the viewers. The journal aims to provide leading services to the global research audience worldwide, which is well reflected in the Open Access facility of the journal. This facility is provided to the researchers, especially scholars so that the published research articles are readily available to them, free of charge, and also for rapid dissemination of research published in the journal publicly.
